Traffic safety at the forefront for LPPD as new school year begins

The summer vacation season is reaching its end, and the La Porte Police Department is once again reminding drivers to remain cautious while driving within areas surrounding the City’s various school campuses.

As most LPISD students begin their return to school on Monday, August 26th (Freshman returning on Friday the 23rd), there will be an obvious increase in the amount of pedestrian traffic, bicycle riders, school busses, and mere number of vehicles along the roadway. Therefore, motorists traveling during morning and mid-afternoon hours should expect delays in their commute as school zones will be back in effect. These factors, combined with construction-related impediments and often unforeseen weather conditions, which become more frequent this time of year, call for area motorists to exhibit an increased level of caution while traveling in these sensitive areas of La Porte.

As a primary effort of ensuring community safety near district schools, La Porte patrol officers will increase their presence near LPISD campuses and will also aid School Resource Officers in handling various problems which occur on or near the grounds of each campus. In addition, during both the beginning and the end of each school day, La Porte Police Traffic Division members will focus their enforcement efforts primarily on the areas surrounding schools as well. While the usual speeding, seat belt, and red-light violations will be heavily targeted, officers will also be on the look-out for vehicles blocking intersections and those who choose to avoid intersections by traveling through business parking lots or racing down residential side-streets in an effort to minimize their exposure to congested traffic areas.

As an additional reminder, Texas State Law allows for La Porte’s City ordinance prohibiting the use of electronic communication devices, such as cell phones, within School Zones. Fines for these violations can exceed $300, while speeding violations within School Zones begin at $200.

Overall, La Porte Police Department encourages drivers to consider allowing for extra travel time, and to be safe. These two techniques, along with extra attention to those on foot or riding bicycles, will undoubtedly go a long way in keeping the community safe.
